

## **Overview of Travel Agent PowerPoint Project**

You are a travel agent and need to design a PowerPoint slideshow presentation for a great place for a fairly wealthy family of four (mom, dad, 10 year old girl and 7 year old boy) to go on vacation. You may pick any place you like and more than one person can do the same place. However, the place needs to be appropriate for the specified family so I reserve the right to deny any place that is inappropriate. You will show your presentation to the entire class as if you were showing it to the family for them to decide if they want to go where you suggest.

**Super Very Important Note:** You are making this presentation to a family to try and sell them on going on vacation to the place you suggest. Since they are fairly wealthy, you shall not discuss costs. Also, this is not a history lesson of some third world country that nobody wants to visit. They will not care about the population of the country, whether or not they export textiles or if they grow sugarcane. They will want to know where the fun is so please do not submit a history or geographical report on some boring country. This family is going on vacation to have lots of fun.
